

Unit 1 In Port

Read & Listen: Back on Duty

Exercise 1

1. The Marina is a multi-purpose dry cargo vessel- 2. She is moored to the quay- 3. Captain James walks up the gangway- 4. Captain James is back at work after his annual leave

Exercise 2

1. The trucks are rushing- 2. They are delivering- 3. The stevedores are moving- 4. The crane drivers are operating- 5. The quayside cranes and the ship's derricks are loading and unloading- 6. The deckhands on board must lash- 7. Examples of lifting devices are slingshooks

Exercise 3

quay

the structure on land to which a ship ties up

berth

a certain place (often numbered) by the quay where the ship can tie up. The berths are given to ships by the Port Authority

to moor

to tie up a vessel

to store

to keep goods

warehouse

a place to store goods in

pier

a quay structure built out from the shoreline towards the sea

harbour basin

the water area surrounded by quays in port

crane

a machine for lifting heavy things

Important Structures

Exercise 1

1. In his day room the Captain is **writing** his signature on important documents on his desk.
2. The engineers are **overhauling** the engines. The pipelines are **filling** the fuel tanks with fuel.
3. The trucks are **moving** the containers from the warehouses to the quay.
4. The Second Mate is **supervising** work on deck and he is **studying** the stowage plan.
5. He is **speaking** on the radio to the crane operators.
6. The deckhands are **opening** the hatch covers to prepare for loading.
7. Now the men are down in the holds; they are **checking** the ventilation systems and lights.
8. The stevedores are given the green light and now they are **loading** the bulk cargo into the holds.
9. Bulk loading is finished! Now the men are **closing** down the hatches.
10. The crane is **lifting** the containers on board.
11. Finally everything is ready and the pilot is **coming** on board. The Marina is ready for departure!

Exercise 2

Daily routines in port operation

1. A crane driver **operates** the cranes.
2. A stevedore **attaches** slings to the bales and crates.
3. A quayside crane **lifts** the cargo on board the ship.
4. Before the voyage the men lift the cargo on board the ship; they **load** the ship, and in the port of destination they take the cargo ashore they unload or **discharge** the cargo.
5. On a cargo vessel you **store** cargo in the holds or on deck.
6. Why **do you lash** the cargo on board a ship?
7. It is important to secure or lash the cargo so that it **does not shift** during a voyage.
8. A ship **moors** at a berth by the quay.
9. A merchant vessel often has a long voyage before she **reaches** her port of destination.
