

Unit 11 Survival in an Emergency

Read & Listen: A Boat Drill on Board the MS Marina

Exercise 1

The following is heard on the loudspeaker...

This is your **Captain** speaking. All **officers** report to the bridge. All crew members to **assembly stations!**

Leave the engine-room, the **superstructure** and your cabins immediately!

Take **lifejackets** and emergency equipment with you according to the **muster list**.

Do not go to the lifeboat stations before ordered or enter the **life-rafts and lifeboats** - the order to enter will be given by the officers.

Exercise 2

- Evacuate all decks, rooms and spaces and report!
- All decks, rooms and spaces **evacuated**.
- Assembly station 1. This is Bridge. Report on **number of crew** at assembly station!
- Bridge. This is Assembly station 1. Number of crew members at station is **not yet complete**.
- Assembly station 1. This is Bridge. **Search** for **missing** crew members and report.
- Bridge. Assembly station 1. Missing crew member **recovered**.

Exercise 3

ABANDONING VESSEL

- **<Lifeboatmen>!** Check the **<outfit>** of crew members at assembly stations and report!
- **<Outfit>** of crew is complete.
- Put on **<warm clothing>** - long trousers, head covering and report. Crew! Follow the lifeboatmen to the lifeboat stations and life-raft stations on the **<embarkation deck>**.
- **<Swing out>** number 1 and 2 lifeboats and report.
- Number 1 and 2 lifeboats **<swung out>**.
- Lower number 1 and 2 lifeboats **<alongside>** embarkation deck. Enter the lifeboats via the deck. Hold on to your seats while **<launching>**.
- **<Throw overboard>** life-raft and report!
- Life-raft **<thrown overboard>**.

Exercise 4

Enter the life-rafts via the slides, ladder, <nets and manropes>.

<Jump> onto the life-raft <alongside> the vessel.

Clear the <entrance> of the life-raft.

Jump into the water and enter the life-rafts.

Assist <helpless people>.

Sit down <in the life-rafts> immediately.

Report on number of <injured> persons!

No persons <injured>.

Let go <sea anchor> and report!

<Sea anchor> is let go.

<Fire rockets> for identification

<Connect> the life-boats and rafts with lines and report!

Life-rafts and lifeboats <connected>.

Read & Listen: Survival

Exercise 1

IF YOU HAVE TO ABANDON SHIP

Put on <waterproof> clothes, for example, rescue suits and <lifejacket>.

Assist in loading extra water, <provisions> (not protein food) and blankets.

<Release> lifeboat or cut life-raft painter.

Secure painters, <launch> lifeboats/rafts and board safe if possible.

Assist <clearing> the ship's side and danger area, stream the <sea anchor>.

<Avoid> unnecessary swimming if you have to enter the water.

SURVIVAL AFTER SHIPWRECK/ GENERAL

Help protect yourself from the environment:

- take <anti-seasickness> pills
- <inflate> floor and use doors to regulate conditions in life-rafts
- in open lifeboats, erect <canopy>. Keep as warm and dry as possible.
- follow the instructions in the <survival equipment>.

Exercise 2

POST COMMAND

The senior fit <survivor> must take command and decide on:

- the <**distribution**> of survivors (full rafts in cold climates, as few as possible in hot climates)
- a <**congregation**> of rafts and boats to make a better <**target**> for air search
- navigation
- fair <**rationing**> of food supplies
- distribution of duties, lookouts and routine.

Exercise 3

FIRST PRIORITY: PROTECTION

You should:

- **1. bail out the boat/raft**, inflate life-raft floor, rig canopy (boats), close entrances
- keep the raft/ boat dry, prevent **2. reswamping**, keep head to wind and cast sea anchor
- check for leaks and make repairs, collect useful **3. flotsam**.
- apply first aid
- treat for **4. asphyxia** / breathing difficulties; (clear airways, **5. commence** mouth-to mouth)
- stop bleeding (apply **6. pad** and bandages)
- treat for shock (keep warm, **7. encourage**, **8. relieve pain**)
- treat **9. fractures**
- prevent sea sickness (everyone should take a pill if available)
- keep clothing on. Wet clothing is much better than no clothes. **10. Insulate** yourself from weather and water as well as you can.

1. to empty lifeboats or life-rafts
2. getting wet again after drying of water
3. useful material from the ship floating around in the water
4. choking, or having great difficulties in breathing
5. start
6. a piece of soft material used on wounds
7. to support, to give confidence to someone
8. to make pain or bad feeling less severe
9. broken bones
10. to isolate from the environment

Exercise 4

a frostbite	parts of the body turned white from the cold
to dehydrate	to dry up
to massage	to rub parts of the body to stop pain, or get them to relax
weather cover	a cover against wind and rain
to mount	to set up, to get into place
a device	a piece of equipment
a patch	a small area, different from the area around it
in the vicinity	nearby, in the neighbourhood

Extra Text: Fighting Fire on Board

Exercise 1

to endanger	to put into danger
a precaution	a safety measure
a fire main	the main water supply pipe
flammable	something that easily starts burning
to comply with	to follow
a joint	the point where two pieces of machinery join
to ignite	to start burning
a spark	a tiny piece of burning material

a hose	water pipe of rubber or plastic
a hydrant	a connection to the fire main
goggles	tight-fitting glasses
a cluster	a group of objects
a sprinkler	an appliance sending water drops in all directions
a smothering blanket	a blanket to extinguish the fire
portable	something that can be carried
to accumulate	to add up

Exercise 2

1. A Fire-fighter must have protective clothing called a **<fire protection suit>**.
2. To protect his lungs from smoke or toxic gas he has a **<breathing apparatus>**.
3. On his head he has a **<helmet>**.
4. Water, foam or CO2 are different extinguishing **<agents>**.
5. They are used in **<portable>** extinguishers that fire-fighters carry and use in a quick response.
6. Some substances can start to burn by themselves – they can **<self-ignite>**.

7. In a fire situation all the crew have their special duties that are written down in the **<Station Bill>**.
8. To get water from the fire main, fire pumps and fire engines are joined by hoses to the **<hydrants>**.
9. The piece at the end of a hose that directs the flow of liquid is a **<nozzle>**.
10. Even a tiny **<spark>** from a cigarette can start a fire.
11. So remember to follow or **<comply with>** the rules.
12. You must take all the necessary safety rules or **<precautions>** to make the ship a safer place.
13. A **<flame>** is really hot bright burning gas.
14. Different **<fire fighting>** methods are used to extinguish different kinds of fire.

Exercise 3

Check the **<fire alarms>** and report.

Check the **<portable fire extinguishers>** and report.

Check the **<fire mains>** and report.

The **<hydrants>** are not operational yet.

Replace **<worn hoses>**.

The hose **<nozzles>** are missing.

The fixed **<foam system>** is now operational.

Check the **<sprinkler system>** and report.

Check the **<ventilation>** system and report.

<Fire dampers> are stuck.

Check **<watertight door control>** and report.

Switch off **<electrical lighting>** in accommodation.

Check **<emergency power>** supply!

Containers with **<dangerous goods>** on fire. Smoke is **<toxic>**.

Close all **<openings>** and report.

<Stand by> fire-fighting team. Fire-fighting team must have fire **<protection suits>**, smoke **<helmets>** and **<breathing>** apparatus.
