

Port State Control, Part 1

Exercise 1

1. Why is Port State Control needed in ports?
To eliminate sub-standard ships
2. What is Port State Control in European ports based on?
On the Paris Memorandum of Understanding
3. Who is it carried out by?
By PSC officers
4. Where are these inspections held?
On board ship
5. How does an inspection usually begin?
It usually begins with checking the statutory certificates

Exercise 2

1. In Europe Port State Control is based on the Paris Memorandum.
2. It aims at eliminating the operation of sub-standard ships.
3. In the Pacific area the Tokyo Memorandum was signed some time ago.
4. The inspections take place on board foreign vessels in the Paris MoU ports.
5. A Port State Control visit on board will normally start with verification of documents.

Port State Control, Part 2

Exercise 8

1. The Captain **has been instructed** to rectify the deficiencies before the ship's departure
2. The ship owners **have been notified** about the detention of the vessel.
3. The Master **has been asked** to present the crew certificates.
4. The Chief Mate **has been informed** about the results of the inspection.
5. The Chief Engineer **has been asked** to prepare oil separators for inspection.

Exercise 9

Oil tankers	Bulk carriers	Gas and Chemical tankers	Passenger ships
control of pressure of inert gas and oxygen system	possible deformation and corrosion of hatch covers	cargo tank monitoring and safety devices relating to temperature, pressure and ullage	test of Public Address system
inspection of ballast tanks from tank manhole	possible cracks or local corrosion in transverse bulkheads	cabin escape sets giving suitable respiratory and eye protection to every person on board	fire drill where, as a minimum, all sets of fireman's outfits must be demonstrated and part of the catering crew take part
	access to cargo holds	checking that the product being carried is listed in the International Certificate of Fitness or Certificate of Fitness for the Carriage of Dangerous Chemicals in Bulk or Liquefied Gases in Bulk	

Exercise 10

AS stands for <**Annual**> Survey

MAS stands for <**Mandatory Annual**> Survey

INT stands for <**Intermediate**> Survey

REN stands for <**Renewal**> Survey

PER stands for <**Periodical**> Survey

Exercise 11

	1 st syllable	2 nd syllable
The transfer of money was considerably delayed by the bank	X	
The money was transferred late due to some problems with the bank.		X
The reference was made to the SOLAS conventions.	X	
The PSC officer referred to the MARPOL convention.		X
The PSC officer keeps a record of all the ship's deficiencies.	X	
All the ship's deficiencies have been recorded in the books.		X
Maritime transport plays an important role in world economy.	X	
Oil is usually transported in tankers.		X
Export of vegetables from Poland has increased recently.	X	
A lot of vegetables have been exported from Poland.		X

Exercise 12

- Good morning, Captain. My name is Rodrigo Sanchez. I am a Port State Control Officer and I've come to <**inspect**> your vessel. Here is my <**Id card**> and my <**number**>.
- Good morning, Sir. <**Welcome**> on board. Would you like to see the <**bridge first**> or the engine room?
- Well, let's <**start from**> the bridge. I'd like to see the <**life-saving**> equipment and the lifeboat <**drill**> carried out on board. When did the last <**PSC inspection**> take place on board this vessel?
- The last PSC inspection was <**carried out**> two years ago.
- Where did it <**take place**>?
- It took place in Cadiz in <**Spain**>.
- Were there any <**deficiencies**> found on board? Could I see the list and the <**report**> from the last inspection, please.
- Yes, certainly. Let's have a look at the papers. Here you are.
- Have the deficiencies been <**corrected**> as required?
- Yes, they were corrected at <**the next port**> of call.
- OK. Let's look at the lifeboats, <**fire-extinguishing**> systems and smoke detectors.
- Fine, let's walk round the ship.

Exercise 13

	-t	-d	-id
The ship's propeller has been seriously damaged as a result of a collision.		X	
The vessel's hull needs to be painted urgently.			X
The PSC officer has asked the Master to show him round the vessel.	X		
The engine has been tested thoroughly.			X
The Chief Officer informed the crew about the inspection.		X	
The Captain has been instructed to rectify the deficiencies at the next port.			X
The PSC officer walked round the vessel looking at the equipment.	X		
I have notified the owners about the results of the inspection.		X	
The Master talked to the PSC officer for a long time.	X		
The tanks must be inspected carefully.			X

Exercise 14

The check list is to be filled in during the inspection on board a particular ship.
