

Unit 8 Mayday Mayday

Read & Listen

Exercise 1

1. First the Viking Princess had <engine> trouble.
2. The Marina took a position <windward> of the Viking Princess.
3. The crew on the Marina <lowered> the lifeboat on the <lee> side of the vessel.
4. They then took the lifeboat to the Viking Princess and took on the <distressed> crew.

Exercise 2

Listening comprehension

- | | |
|---|---|
| 1. The vessel was carrying sand. | T |
| 2. The vessel met with a heavy storm. | T |
| 3. The cargo was damaged. | F |
| 4. The cargo shifted in the between decks. | F |
| 5. On inspection they found water in the holds. | F |
| 6. There was injury to the crew. | F |
| 7. The ship arrived safely in port. | T |

Exercise 3

"I remember once some 10 years ago when I was working on a cargo vessel carrying sand. We were carrying a cargo of nearly <6000 tons> of sand when the vessel encountered a heavy storm with <wind gusts> up to 60 knots and <seas> of a height of 25 to 30 ft. The ship's speed was about 11 knots and she was almost <beam on> to the wind and was rolling up to <35 to 40>°. Suddenly she took <a few heavy rolls> of more than 40/50°. The sand in the bags was squeezed, and the cargo <shifted> in the lower hold as well as in the between decks about 6 feet to the port side. This made the ship <list to port> 10 to 15°.

The bridge gave orders <to reduce speed> and the ship heaved to the wind. The English Coastguard was alerted and I, along with the deck crew, inspected No. 4 hold, which was closest to <the accommodation>. We found that the cargo had shifted but there was <no damage> and no

water <**in the holds**>. We managed to correct the list <**by ballasting**> the starboard topside tanks, and we then resumed our voyage at full speed with a list of 4 degrees to port. There was <**no injury**> to the crew and <**no damage**> to the cargo, and we later arrived safely in port. But it is a voyage I'll never forget.

Important Structures: A Mayday Message

Exercise 1

Distress message

Mayday

This is

230137000

Aruba

Call sign Sierra Yankee Zulu Zulu

Position:

Latitude 59° 45' North

Longitude 026° 12' East

Collision with thick ice wall. Sinking.

Require immediate assistance
