

SMCP

Navigation

Navigation 1

What is the diameter of	the turning circle?
What is the advance and transfer distance	in a crash-stop?
How long does it take from hard-a-port	to hard-a-starboard?
Is the turning effect of the propeller	very strong?
What notice is required to reduce from full sea speed	to manoeuvring speed?

Navigation 2

Does the radar have any	blind sectors?
Change the radar	to miles range scale.
Stand by port anchors for	letting go.
The cable is leading	ahead.
No, the anchor is not	holding.
Switch on	the anchor lights.
Hoist	the anchor ball.

Navigation 3

to beach	to run a vessel up on a beach to prevent its sinking in deep water
to close up	to decrease the distance to the vessel ahead by increasing one's own speed
to drop back	to increase the distance from the vessel ahead by reducing one's own speed
to proceed	to sail or head for a certain position or to continue with the voyage
to refloat	to pull a vessel off after grounding; to set afloat again
to resume	here: to restart a voyage, service or search
to stand by	to be in readiness or prepared to execute an order; to be readily available

to stand on	to maintain course and speed
to take off	to lift off from a vessel's deck (helicopter)

Navigation 4

Course	the intended direction of movement of a vessel through the water
Course made good	that course which a vessel makes good over ground, after allowing for the effect of currents, tidal streams, and leeway caused by wind and sea
CPA/TCPA	Closest Point of Approach/Time to Closest Point of Approach: limit as defined by the observer to give warning when a tracked target or targets will close to within these limits
Heading	the horizontal direction of the vessel's bows at a given moment measured in degrees clockwise from north
Initial course	course directed by the OSC or other authorized person to be steered at the beginning of a search

Navigation 5

Boarding speed	the speed of a vessel adjusted to that of a pilot boat at which the pilot can safely embark/disembark
Full speed	the highest possible speed of a vessel
Safe speed	the speed of a vessel allowing time for effective action to be taken under prevailing circumstances and conditions to avoid a collision and to be stopped within a appropriate distance
Search speed	the speed of searching vessels directed by the OSC
Transit speed	here: the speed of a vessel required for passage through a canal, fairway, etc.
Fairway speed	the mandatory speed in a fairway
Manoeuvring speed	a vessel's reduced speed in circumstances where it may be required to use the engines at short notice

Navigation 6

Destination	port for which a vessel is bound
Drifting	being driven along by the wind, tide or current
Leeway	vessel's sideways drift leeward of the desired course
List	here: the inclination of the vessel to port side or starboard side
Located	in navigational warnings: position of object confirmed
Obstruction	an object such as a wreck, net, etc., which blocks a fairway, route, etc.
Reported	in navigational warnings: position of object unconfirmed

Navigation 7

Leeward	on or towards the sheltered side of a ship; opposite of windward
Speed of advance	the speed at which a storm centre moves
Variable (of winds)	a wind that is constantly changing speed and direction
Veering (of winds)	clockwise change in the direction of the wind; opposite of backing
Windward	the general direction from which the wind blows; opposite of leeward
Backing (of wind)	a shift of wind direction in an anticlockwise manner, for example from north to west (opposite of veering)
Anabatic wind	any wind blowing up an incline

Navigation 8

Moor (to)	to secure a vessel in a particular place by means of wires or ropes made fast to the shore, to anchors, or to anchored mooring buoys, or to ride with both anchors down
Mooring buoy	a buoy secured to the bottom and provided with means for mooring the vessel by using the anchor or the vessel's mooring lines
Quay	a structure along a shore or bank which provides berthing for ships
Berth	a place for securing a vessel
Bollard	a post (usually steel or reinforced concrete) firmly secured on a wharf, quay, etc., for mooring vessels with lines

Navigation 9

Elongated spreader	step of a pilot ladder which prevents the ladder from twisting
Hoist	a cable used by helicopters for lifting or lowering persons in a pick-up operation
Accommodation ladder	ladder attached to platform at vessel's side with flat steps and handrails enabling persons to embark / disembark from water or shore
Pilot station	the place where the services of pilots are obtained
Pilot	a person with extensive knowledge of channels, aids to navigation, etc licensed to direct the movement of a vessel
Pilotage	the services of qualified navigators with local knowledge to assist in navigation in particular areas
Boarding arrangements	all equipment, such as pilot ladder, accommodation ladder, hoist, etc necessary for safe the transfer of the pilot

Navigation 10

Have your crew <on> stand <by> for heaving <up> anchor when the pilot embarks.

You are <at> anchor in a wrong position.

According <to> my radar, your course does not comply <with> Rule 10 of the COLREGs.

Large vessel is leaving the fairway- keep clear <of> the fairway approach.

Nets with buoys in this area - navigate <with> caution.

Search and rescue <in> progress.

I'm sinking <after> collision

I'm drifting <at> 4 knots

I have problems <with> cargo

I can only proceed <at> slow speed

I am <in> danger <of> capsizing

Proceed <with> your voyage

Person picked <up> is crewmember

Assist <with> search <in> vicinity <of> position

Navigation 11

jettison	Can you <i>throw cargo overboard</i> to refloat?
proceed	Can you <i>sail</i> to distress position?
embark	When will pilot <i>go aboard</i> ship?
drop back	You must <i>increase distance to</i> the vessel ahead of you <i>by reducing your speed</i> .
launch	How many lifeboats will you <i>lower to the water</i> ?
keep clear	<i>Keep away from</i> the vessel and report.
list	I have an <i>inclination of the vessel</i> to port side.
capsizing	I am in danger of <i>turning upside down</i> .
wreck	Dangerous vessel <i>that has been destroyed</i> located in position
escape routes	Check <i>paths that have to be followed in case of an emergency</i> and report.
reference line	You are on <i>the line separating the fairway for inbound and outbound vessels</i> .
fairway	You are approaching starboard limit of <i>navigable part of waterway</i> .
convoy	Icebreaker assistance for <i>group of vessels</i> finished.
obstruction	<i>Object which blocks fairway</i> located in position...
flooding	flooding

Navigation 12

1. Can you pick <up> survivors?
2. Stand <by> lifeboats.
3. Survivors are <in> bad condition.
4. You may stop search and proceed <with> voyage.
5. I will arrange <for> medical advice on VHF.
6. I have problems <with> engine
7. Keep clear <of> me.
8. Can you proceed <without> assistance?
9. Visibility is restricted <by> mist.
10. The present tide is two metres <above> datum.
11. You are not complying <with> traffic regulations
12. You are proceeding <at> a dangerous speed.
13. You must close <up> on the vessel ahead of you.
14. You are <at> anchor in a wrong position.
15. I am <under> attack by pirates.

Navigation 13

1. Charted depth has increased by 6 m due <to> sea state.
2. The MV has a dangerous list <to> port side.
3. The MV has damage <above> water line.
4. Visibility is expected to increase <to> 1,000 m
5. Vessel is not suited <for> the pilot ladder.
6. You cannot enter the channel – wait <until> 14:00 UTC.
7. The charted depth of water is increased <by> 4 m due to winds.
8. No fishing gear ahead <of> you.
9. The MV can proceed <at> slow speed.
10. There is risk of grounding <at> low water.

11. The officer <of> the watch should brief the relieving officer on position, movements and draft.
12. The helicopter is <on> the way to you.
13. I am making identification signals <by> search light.
14. You (the helicopter) can land on deck <in> 3 minutes.
15. I will arrange <for> medical advice on VHF.
16. When was the last training session <on> occupational safety?
17. Fire rockets <for> identification.
18. Is fire <under> control?
19. Chief Engineer <in> command.
20. Engine room remains <on> stand by.
21. Danger of damage <by> sea.
22. Rescue persons <in> the following order.
23. Check the containers <for> damage.

Navigation 14

1. I'm sinking **after** collision
2. I'm drifting **at** 4 knots
3. I have problems **with** cargo
4. I can only proceed **at** slow speed
5. I am **in** danger of capsizing
6. Proceed **with** your voyage
7. Person picked **up** is crewmember
8. Assist **with** search in vicinity of position
9. ETA at distress position **within** 4 hours
10. There is risk of grounding **at** low water.

Navigation 15

off station (of buoys)	not in charted position
seamark	a navigational aid placed to act as a beacon or warning
unlit	when the light of a buoy or a lighthouse are inoperative
cardinal buoy	a seamark, i.e. a buoy, indicating the north, east, south or west, i.e. the cardinal points from a fixed point such as a wreck in shallow water, sand banks etc.
beacon	a fixed artificial navigation mark
buoy	an unmanned floating device moored or anchored to the bottom as an aid to navigation
buoyage	a system of buoys

SMCP

Safety and Fire Fighting

Safety and Fire Fighting 1

Always remember that fire is the greatest **1. danger** aboard ship. Always act **2. at once** if you detect fire, smell, fumes, smoke or smell of gas or smoke. Be sure to **3. put out** cigarettes completely.

Never smoke on deck except in **4. places** labelled as smoking areas. The use of naked light and open fire strictly **5. prohibited**. If you detect fire, smell, fume or smoke operate the nearest fire **6.**

warning system. Lifejackets are **7. kept** in your cabins under your beds. All passengers are requested to follow **8. clearly marked ways in the vessel which have to be followed in case of an emergency**. If one of your cabin mates is not able to attend **9. the assembly of passengers and crew members** please inform the officer immediately.

- 1. hazard**
- 2. immediately**
- 3. extinguish**
- 4. areas**
- 5. forbidden**
- 6. alarm**
- 7. stored**
- 8. escape routes**
- 9. roll call**

Safety and Fire Fighting 2

Act in accordance with the emergency plan. **1. Don** protective clothing and breathing apparatus. Stop the spillage. Let the spillage **2. change into steam**. Use absorbents for the spillage. Separate **3. poisoned** goods from other goods. Ventilate the holds **4. thoroughly**. Fight the fire from a distance. Take injured persons to a safe area. **5. Give** first aid to injured persons. Take off and **6. get rid of** clothing. Alter course for the nearest port. Check the proper **7. separation** of goods. Stow infected goods away from **8. accommodation**.

1. put on
2. evaporate
3. contaminated
4. carefully
5. provide
6. dispose off
7. segregation
8. living quarters

Safety and Fire Fighting 3

When the general alarm **1. is raised**, which consists of seven short blasts and one prolonged blast, all passengers must **2. proceed** to their assembly station. **3. Fetch** your lifejackets and blankets with you. Lifejackets are **4. kept** in your cabins under your beds and at your assembly stations. You are encouraged to try on your lifejacket. All passengers should put on warm clothing, long trousers, long-sleeved shirts/jackets, strong shoes and head covering. All passengers with their lifejackets and blankets are **5. asked** to go to the assembly stations. From your assembly stations you will be **6. shown** to your lifeboats. All passengers are asked to **7. keep** to the escape routes shown. During the voyage you may hear some other sound signals. They are only for the information of the crew. If you have any questions **concerning** safety, do not hesitate to ask any of the officers or crew.

1. is sounded
2. go
3. take
4. stored
5. requested
6. escorted
7. follow
8. regarding

Safety and Fire Fighting 4

crash-stop	an emergency reversal operation of the main engine(s) to avoid a collision
damage control team	a group of crew members trained for fighting flooding in the vessel
derelict	vessel still afloat, abandoned at sea
disabled	a vessel damaged or impaired in such a manner as to be incapable of proceeding on its voyage
distress alert (GMDSS)	a radio signal from a distressed vessel automatically directed to an MRCC giving position, identification, course and speed of the vessel as well as the nature of distress
escape route	a clearly marked path in the vessel which has to be followed in case of an emergency
flooding	major uncontrolled flow of seawater into the vessel
general emergency alarm	a sound signal of seven short blasts and one prolonged blast given with the vessel's sound system

muster list	a list of crew, passengers and others on board and their functions in a distress or drill
not under command	(abbr. NUC): a vessel which through exceptional circumstances is unable to manoeuvre as required by the COLREGs
survivor	a person who continues to live in spite of being in an extremely dangerous situation, e.g. a shipping disaster
wreck	a vessel which has been destroyed, sunk or abandoned at sea
to capsize	to turn over
to abandon vessel	to evacuate crew and passengers from a vessel following a distress
casualty	case of death or injury in an accident or shipping disaster

Safety and Fire Fighting 5

to check	to make sure that equipment etc. is in proper condition or that everything is correct and safe
fire monitor	a fixed foam/powder/water cannon shooting fire-extinguishing agents onto the tank deck, manifold etc.
leaking	an escape of liquids such as water, oil, etc., out of pipes, boilers, tanks, etc., or a minor inflow of seawater into the vessel due to damage to the hull
lifeboat station	a place assigned to crew and passengers to muster before being ordered into the lifeboats
to make water	to have seawater flowing into the vessel due to hull damage, or hatches awash and not properly closed
overflow	an escape of oil or liquid from a tank because of a twofold condition as a result of overflowing, thermal expansion, change in vessel trim or vessel movement

PA-system	public address system: loudspeakers in the vessel's cabins, mess rooms, etc., and on deck through which important information can be broadcast from a central point, mostly from the navigation bridge
roll call	the act of checking how many passengers and crew members are present, e.g. at assembly stations, by reading aloud a list of their names
spill	the accidental escape of oil, etc., from a vessel, container, etc., into the sea
spill control gear	anti-pollution equipment for combating accidental spills of oils or chemicals
assembly station	place on deck, in mess rooms, etc., assigned to crew and passengers where they have to meet according to the muster list when the corresponding alarm is released or announcement made
briefing	a concise explanatory information to crew and/or passengers

Safety and Fire Fighting 6

Always remember that fire is the greatest hazard aboard ship.

Always act immediately if you detect fire.

Always inform a member of the crew if you detect smoke.

Be careful to extinguish cigarettes completely.

Put used cigarettes in a container provided.

Never smoke in bed.

Never smoke on deck except in areas labelled as smoking areas.

Never throw a cigarette overboard.

The use of naked light is strictly prohibited.

Never use lighted candles.

Never hang anything over or near an electric bulb.

Never use an electric iron in a cabin.

Safety and Fire Fighting 7

Enter the lifeboat only when ordered by an officer.

Clear the entrance of the lifeboat immediately after entering.

Do not push each other when entering the lifeboat.

Hold on to ropes or to your seat when lowering.

Sit down in the lifeboat immediately.

Keep your lifejackets on.

Provisions and drinking water will be distributed by an officer only.

Strictly obey all instructions given by the officer.

Discipline in the lifeboat is of vital importance.

Safety and Fire Fighting 8

Emergency announcement

Attention please! Attention please!

This is your captain with an important announcement.

I repeat, this is your captain with an important announcement.

We have a minor fire.

There is no immediate danger to our passengers or our ship and there is no reason to be alarmed.

For safety reasons we request all passengers to go to their assembly stations on deck number 5 and wait there for further instructions.

Please follow the instructions given by the officers and the crew.

As soon as I have further information I will make another announcement.

I ask you kindly to remain calm.

There is no danger at this time.

Safety and Fire Fighting 9

Evacuation

When the general emergency alarm is sounded which consist of seven short blasts and one prolonged blast all passengers have go to their assembly station.

Take your lifejackets and blankets with you.

Lifejackets are stored in your cabins under your beds and at your assembly stations.

You are encouraged to try on your lifejacket.

All passengers must put on warm clothing.

All passengers with their lifejackets and blankets are requested to go to their assembly stations immediately.

From your assembly stations you will be escorted to your lifeboats.

Do not use lifts or elevators.

If you have any questions regarding safety, do not hesitate to ask any of the officers or crew.
