

Vessel Types

Bulk carriers

Exercise 1

loose goods

in bulk

engine room

bulkheads

stowed

handling gear

deadweight

shore devices

flexible ductings

conveyors

ballast tanks

tankers

Exercise 2

Fertiliser	something put into the soil to improve its quality
Ore	any natural substance from which materials can be extracted
Fan	device for blowing air or some light material in bulk
Grab	device for clutching something to be hoisted
Coke	coal without gases used as fuel
Ducting	a tube, a leading or a canal through which some liquid.....
Sand	tiny, loose particles of worn rock deposited along shores, or in deserts
Conveyor	mechanical chain or belt for transporting goods

Vessel Types

Containerships

Exercise 1

containers
sealed
Containerships
guide rails
cellular
machinery spaces
open deck
water transport
26 knots
gantry cranes
directly
capacity
loading gear
cargo gear
container feeders

Exercise 2

- a. the cheaper
- b. the easier
- c. the more
- d. the lower
- e. the larger
- f. the better

Vessel Types

Tankers

Exercise 1

- 1. false
- 2. true
- 3. false
- 4. false
- 5. true
- 6. true
- 7. true
- 8. false

Exercise 2

liquefied	gases
pumping	station
shore	facilities
flexible	pipelines
oil	products
sailing	routes
strict	requirements
loading	port

Vessel Types

Car carriers

Exercise 1

symmetrical line

deck arrangement

shore facilities

innovative approach

economic maintenance

hoistable decks

load capacity

top-classified

ferry terminals

IMO requirements

navigating bridge

considerable experience

Vessel Types

Industrial ships

- The -ing form

Exercise 1

A PART OF VERB	AN ADJECTIVE	A GERUND
have been taking	non-trawling vessels	storing
	fishing vessels	catching
	processing ships	dragging
	fishing net	canning
		drawing out
		trawling
		extracting
		processing

Vessel Types

Cable-laying ships

Exercise 1

<The> first ever cable ship was <the> Goliath, chartered in order to lay a telegraph cable across <the> English Channel in <--> 1850. It was not designed as a cable ship, but just converted to carry a tank and simple cable handling gear. The conversion of ships to lay cables continued. <The> most notable was <the> Great Eastern, the only ship large enough to carry <the> single length of cable needed to span <the> Atlantic. She began her life in <--> 1858 as <the> Leviathan, a passenger ship on <the> Australian and Far East route. Then her name was changed to <the> Great Eastern. It weighted 18,000 tons and was 700 feet long and 85 feet wide. It carried three enormous cable tanks. On <the> 4th <--> April 1864, the cable manufacturers, Glass Elliot of <--> Greenwich came to an agreement with <the> Great Eastern Steamship Company and her new life as a cable ship began. She laid the successful <--> Atlantic cable of <--> 1866 with <--> James Anderson as <the> captain. In <--> 1872, <the> Great Eastern was docked in <--> Liverpool.

Exercise 2

A	D	C	E	B	F
---	---	---	---	---	---

Vessel Types

The Estonia ferry

Exercise 1

NOUN	INFINITIVE	PAST PARTICIPLE
entrance	to enter	entered
collision	to collide	collided
requirement	to require	required
prevention	to prevent	prevented
building	to build	built
attempt	to attempt	attempted
reaction	to react	reacted
observation	to observe	observed
drawing	to draw	drawn
extension	to extend	extended

separation	to separate	separated
list	to list	listed
accommodation	to accommodate	accommodated
disappearance	to disappear	disappeared
construction	to construct	constructed
maintenance	to maintain	maintained
position	to position	positioned
assistance	to assist	assisted
delivery	to deliver	delivered

Vessel Types

The Estonia ferry

- **Active and Passive forms**

Exercise 1

TO BE form	PAST PARTICIPLE	TENSE
are	maintained	Present Simple
is being	repaired	Present Continuous
have been	conquered	Present Perfect
could not be	seen	Past Simple
were	trapped	Past Simple
had been	loaded	Past Perfect
were being	separated	Past Continuous
will be	extended	Future Simple
has been being	arranged	Present Perfect Continuous
had been being	operated	Past Perfect Continuous

Exercise 2

Example: 1. Abandon the vessel! (present continuous) >> **The vessel is being abandoned.**

2. **The device will be repaired**
3. **has been given**
4. **New crew members were instructed**
5. **The emergency plan has been being prepared**
6. **First aid will be provided**
7. **Helpless persons are being assisted**
8. **All guests will be submitted**
9. **All storm doors are closed**
